1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-44, drawn to a system for correcting an image frame, classified in class 348, subclass 222.1.
- II. Claim 44, drawn to a method for generating an image in an airborne vehicle, classified in class 348, subclass 117.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are unrelated.

Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are not capable of use together and have different operation such as the inventions of Group I is used to correct image frame based on luminance level while the inventions of Group II is used to correct image based on characteristics of a sensor in an airborne vehicle.

2. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the

product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
